

Portable Appliance Testing (PAT)

We deliver a PAT service nationally that is reliable, cost-effective and supported by a comprehensive reporting process.

We deliver a PAT service nationally that is reliable, cost-effective and supported by a comprehensive reporting process.

Our test engineers are fully trained to City & Guilds standards and are experienced in testing a wide variety of sites from hospitals to hotels and Corporatae offices to colleges.

There are no hidden costs – our prices will include:

- Fuse changes
- Plug changes
- Re-terminations
- Microwave Leakage Tests

We will label everything we test with a unique barcode designed to last the life of the appliance. The test data stored is comprehensive and not only records details of the appliance, its manufacturer and location, but also all of the electrical test results.

All of this information is reproduced on our comprehensive report that in effect can be used as a detailed asset register. Any items that fail the test are listed in the report including a photograph to aid identification.

“Site specific surveys can usually provide easy to affect solutions to the problem of rising energy costs.”
